& Communities

github.com/amfoss/gitlit

### SRX

Modern, Responsive  
React Component  
Library

github.com/rivivo/srx

As a free-spirited, resolute, enterprising person, I work towards making an impact in people's life, by passionately understanding their problems, thinking out of the box solutions, and sharing a rapport with teams to produce effective and scalable solutions. I am a student of life, for life, always critical and curious of the world around, and actively looking for exploring opportunities and taking on challenges.
